

1. Java Program: Are you above 18 years old?

Sample Output:

Please enter your age: 21

You are eligible to vote.

```
package wirpotra;

import java.util.*;

public class ass1st {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        System.out.print("Enter your age:");

        int age=sc.nextInt();

        if(age>=18)

        {

            System.out.println("you are eligible to vote");

        }

        else

        {

            System.out.println("you are not eligible to vote");

            sc.close();

        }

    }

}
```

2. Java Program: Print Multiplication Table Using for Loop

Sample Output:

Enter a number to print its its multiplication table: n

Multiplication table for n:

```

package wirpotra;

import java.util.*;

public class Multi {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        System.out.print("Enter a num to print its multiplication table: ");

        int n=sc.nextInt();

        System.out.print("Multiplication table for:"+n);

        for(int i=1;i<=10;i++)

        {

            System.out.println(n+" "+"X"+" " +i+" "+"="+" "

                               +n*i);

        }

        sc.close();

    }

}

```

Java Program: Character, String, and Boolean Input Example

Sample Output:

Enter a single character: A

Enter your name: Alice

Do you like programming? (true/false): true

user Input Summary Character entered: A

Name entered: Alice

Likes programming: true

Great! Keep coding, Alice!

```
package wirpotra;

import java.util.*;

public class asses3 {

    public static void main(String[] args) {

        Scanner sc=new Scanner(System.in);

        System.out.print("Enter a single char:");

        char ch=sc.next().charAt(0);

        System.out.print("enter your name:");

        sc.nextLine();

        String name=sc.nextLine();

        System.out.print("Do you like programming?(true/false:");

        boolean likesprogramming=sc.nextBoolean();

        System.out.println("character entered:"+ch);

        System.out.println("Name entered: "+name);

        System.out.println("likes programming: "+likesprogramming);

        if(likesprogramming)

        {

            System.out.println("great!Keep coding: "+name);

        }

        sc.close();

    }

}
```
